Simple Rules for Ordering

To insure the prompt and accurate filling of orders, kindly make up orders alphabetically, as the goods are offered in the catalog.

We quote all seeds by pound instead of pint, quart, peck and bushel.

TESTED SEEDS. We test all of our seeds for both purity and germination, and have a large electric tester, built according to the plans approved by the Government Department of Agriculture.

NON-WARRANTY. Most of the failures with seeds, plants and bulbs are due to causes entirely beyond our control, such as unfavorable weather or soil conditions, too deep or too shallow planting, etc., which renders it impossible for us to guarantee success, although we take all possible care to supply only such goods as will, under proper conditions, produce satisfactory results. We cannot hold you responsible or implied as to purity, description, quality, productivity, or any other matter, of any seeds, bulbs or plants sent out, and will not, in any way be responsible for the crop. It must, however, be plain to everyone who gives the matter the slightest thought, that it is to our best interests to send out only such stock as will not only grow but prove true to name and description.

ERRORS. Errors sometimes occur, in which event we wish to be promptly notified of the fact and will make such corrections as will be satisfactory. Errors made in the catalogue are subject to correction. Please keep copies of all your orders for comparison.

OUR TERMS are cash with order. We cannot ship C. O. D. unless you remit at least one-fourth of the price for the lot. Please keep copies of all your orders for comparison.

To insure the prompt and accurate filling of orders, kindly make up orders alphabetically.

We are always pleased to make good any mistake but all complaints must be made within 10 days from receipt of goods. You can have the Experiment Station test any of our seeds and if not satisfactory will take it back and refund to you.

We are always pleased to make good any mistake but all complaints must be made within 10 days from receipt of goods. You can have the Experiment Station test any of our seeds and if not satisfactory will take it back and refund to you.

OUR RESPONSIBILITY. We have been in business here for 42 years. We would be pleased to have you write on your stationery, bank, or business firm here in Lincoln as to our standing.

FREE SAMPLES. We are always too glad to send you free samples of Corn, Grass, and other Field Seed for testing purposes. You are not imposing on our good nature when you ask us to send you these samples, for we know the quality of the samples will bring your order.

LARGE ORDERS. Any market gardener, association or individual requiring large quantities of seeds, are invited to write for special prices. Although we have made our prices in this catalog very low, yet when a considerable quantity in pounds or bushels is wanted, we are in a position to supply at a lower price or for by a single pound or bushel. We wish it to be distinctly understood, however, that we will not sacrifice quality in so doing. Mail us a list of your wants, and we will submit to you our lowest cash price for the lot.

We quote all seeds by pound instead of pint, quart, peck and bushel.

MAXIMUM WEEKS. We quote all seeds by pound instead of pint, quart, peck and bushel.

PARCEL POST WEIGHT LIMIT

The weight limit within the Local, 1st, 2nd and 3rd Zones is seventy (70) pounds, within the other Zones it is fifty (50) pounds and the size limit eighty-four (84) inches for combined length and largest girth.

Packages of seed weighing 5 oz. or less can be forwarded anywhere for 3¢ in one of and half cents for each two ounces, or fraction thereof.
ASPARAGUS ROOTS

The ground should be well manured and deeply spaded. The roots planted 2 feet apart, 1 foot apart in the row, and at least 6 inches deep. These will be ready to use in 1 or 2 years.

Washington Asparagus Roots—1 year, doz., 25c; 2 years, doz., 45c; 50 for $1.25; 100 for $2.50.
Palmetto Asparagus Roots—2 year, doz., 50c; 50 for $1.50; 100 for $2.40.

BEANS

Earliest varieties, ready for table in 40 days; 1 pound to 100 feet of drill; 1½ bushels per acre. The soil best adapted to beans is a light, rich, well-drained loam; which was manured for the previous crop. Beans are extremely sensitive to both cold and wet and it is useless to plant them before the ground has become dry and warm. The largest returns will result from planting in drills from two to three feet apart and leaving the plants two to six inches in the row. Up to the time of blossoming they should have frequent shallow cultivation. Never hoe when the vines are wet, as the pods will rust and become discolored. For succession plant every two weeks.

Red Long—Price: Pkt., 10c; Mammoth Pkt., 25c; postpaid.

DWARF OR BUSH LIMA BEANS

The Bush Limas are quite desirable for the garden, as their cultivation does away with poles. These should be planted edgewise with the eyes down and two inches deep. Plant June 1.

Burpee's Bush Lima—Price: Pkt., 5c; ½ lb., 25c; lb., 40c; postpaid.

Henderson's Bush Lima—Price: Pkt., 5c; ½ lb., 25c; lb., 40c; postpaid.

BEETS

PRICE OF ALL BEET SEED SHOWN ON THIS PAGE:

Pkt., 5c; oz., 10c; 2 ozs., 15c; ¼ lb., 30c; lb., $1.00, postpaid.

One ounce to 100 feet of drill: 5 to 7 lbs., to acre in drills. The early turnip varieties are ready for the table in from 50 to 60 days from sowing of seed. The best results are obtained on a deep rich, sandy loam, in freshly prepared soil which should be pressed firmly over the seed. In dry weather soak seed 24 hours before planting.

Best Early Blood Turnip—Early Model—

Crimson Globe—Eclipse—

Crosby's Early Egyptian—Edmond's Blood Turnip—

Detroit Dark Red Turnip—Woodruff's Early Wonder—

Dewing's Early Red Turnip—Long Dark Blood—

BRUSSELS SPROUTS

Mature 140 to 150 days from seed.

Improved Half Dwarf—Price: Pkt., 5c; oz., 15c; ¼ lb., 40c; postpaid.

BROCCOLI

The culture is the same in all essentials as for cauliflower; in fact, it is a good deal like cauliflower. It is grown most successfully where the season is long, cool, and rather moist. One of the most valuable features is that it withstands greater extremes of temperature than cauliflower.

N. W. White Cape—Price: Pkt., 10c; oz., 25c; postpaid.

CABBAGE

One ounce to 5,000 plants; 2 ounces to transplant an acre. Ready for table in from 100 to 100 days from seed, according to varieties.

For early summer use sow in hotbed in February or March. Before transplanting to the open ground they should be hardened off by exposing them gradually to the night air. For winter use sow in open ground in May or June, taking care in either ease not to let the plants stand too closely, as this makes them "spindling." When five or six inches high, transplant in rows two feet apart one way, and 12 to 18 inches the other way, according to variety, burrying to the first leaf, whatever is the stem length. Hoe frequently, drawing the earth up about the plants until they begin to head.

EXTRA EARLY VARIETIES

Copenhagen Market—Price: Pkt., 5c; oz., 10c; ¼ lb., 15c; postpaid.

Early Jersey Wakefield—Price: Pkt., 5c; oz., 25c; ¼ lb., 75c; postpaid.

Early Winningstedt—Price: Pkt., 5c; oz., 25c; ¼ lb., 75c; postpaid.

Golden Acre—Price: Pkt., 5c; oz., 50c; ¼ lb., 81c; postpaid.

SECOND EARLY OR SUMMER VARIETIES

Early Drumhead—Price: Pkt., 5c; oz., 25c; ¼ lb., 75c; postpaid.

Early Dwarf Flat Dutch—Price: Pkt., 5c; oz., 25c; ¼ lb., 75c; postpaid.

Early Summer—Price: Pkt., 5c; oz., 25c; ¼ lb., 75c; postpaid.

Allhead Early—Price: Pkt., 5c; oz., 25c; ¼ lb., 75c; postpaid.

LATE OR WINTER VARIETIES

Hollander (Danish Ball Head)—Price: Pkt., 5c; oz., 40c; 1/4 lb., $1.00; postpaid.

Large Late Drumhead—Price: Pkt., 5c; oz., 25c; 1/4 lb., 55c; postpaid.

Premium Late Flat Dutch (Selected Strain)—Price: Pkt., 5c; oz., 25c; 1/4 lb., 75c; postpaid.

Mammoth Red Rock—Price: Pkt., 5c; oz., 30c; 2 ozs., 50c; 1/4 lb., 90c; postpaid.

Surehead—Price: Pkt., 5c; oz., 25c; 1/4 lb., 75c; postpaid.

CARROTS

One ounce to row 100 feet long. 3 lbs. per acre. Ready for table in from 95 to 120 days from seed, according to variety.

Any good land if thoroughly and deeply worked will produce satisfactory crops. Sow as early as the ground can be worked, sow the smaller kinds in rows 16 to 18 inches apart. For field culture sow in drills 18 to 24 inches apart.

Chantenay—Improved Long Orange—Ox Heart—Early Scarlet or Short Horn

Price of all Table Carrots: Pkt., 5c; oz., 15c; 1/4 lb., 45c; postpaid.

SWEET CORN

Sweet corn being liable to rot in cold, wet ground should not be planted before May, or until the ground is warm; nothing is gained in time, and much is lost in quality by planting too soon.

One pound will plant 100 hills: 12 to 15 pounds to the acre in hills.

Country Gentleman (Shoe Peg)—Price: Pkt., 5c; lb., 35c; postpaid.

Crosby's Early—Price: Pkt., 5c; lb., 30c; postpaid.

Mammoth White Cory—Price: Pkt., 5c; lb., 25c; postpaid.

Stowell's Evergreen—Price: Pkt., 5c; lb., 30c; postpaid.

CUCUMBERS

One ounce to 50 hills; 2 to 3 lbs. to the acre. Earliest variety ready for table use in 50 to 55 days from seed.

As soon as the weather becomes settled and warm, plant in hills 4 to 6 feet apart each way, with 8 or 10 seeds in a hill, cover half an inch deep, smoothing the hill off with the hoe. Keep the soil well stirred, and when the plants are out of danger of insects, leave 3 or 4 plants to a hill.

Staysgreen—Price: Pkt., 5c; oz., 20c; 1/4 lb., 55c; postpaid.

Davis Perfect—Price: Pkt., 5c; oz., 20c; 1/4 lb., 55c; postpaid.

Boston Pickling or Green Prolific—Price: Pkt., 5c; oz., 20c; 1/4 lb., 55c; postpaid.

Early Cluster—Price: Pkt., 5c; oz., 20c; 1/4 lb., 55c; postpaid.

Early Frame or Short Green—Price: Pkt., 5c; oz., 20c; 1/4 lb., 55c; postpaid.

Everbearing—Price: Pkt., 5c; oz., 20c; 1/4 lb., 55c; postpaid.

Improved Jersey Pickling—Price: Pkt., 5c; oz., 20c; 1/4 lb., 55c; postpaid.

Improved Early White Spine—Price: Pkt., 5c; oz., 20c; 1/4 lb., 55c; postpaid.

Lemon Cucumbers—Price: Pkt., 5c; oz., 20c; 1/4 lb., 65c; postpaid.

CELERY

One ounce to 3,000 plants or 200 feet of drill.

Sow the seed (which is slow to germinate) in shallow boxes or hothot, cover the seed not too deep. Keep the bed moist, almost wet, until the seeds germinate. When about four inches, thin out and transplant so that they may stand three inches apart, when the plants are four inches high, cut off the tops, which will cause them to grow stocky. The essentials to success in celery growing are rich soil and plenty of water. The best results are usually obtained from setting about the middle of June or the first of July.

Celtuce Giant Prague—Price: Pkt., 5c; oz., 30c; 1/4 lb., 55c; postpaid.

Giant Pascal—Price: Pkt., 5c; oz., 20c; 1/4 lb., 55c; postpaid.

Golden Self-Blanching—Price: Pkt., 5c; oz., 50c; 1/4 lb., $1.50; postpaid.

White Plume—Price: Pkt., 5c; oz., 30c; 1/4 lb., $1.00; postpaid.

CHIVES

Chives (Schmittlouch)—A perfectly hardy plant something like an onion. Tops are cut off from time to time and used to flavor soup. Price: Seed, pkt., 10c; postpaid.

CHINESE OR CELERY CABBAGE

Price: Pkt., 5c; oz., 50c; 1/4 lb., $1.75; postpaid.

ENDIVE

One ounce to 100 feet of drill. Ready for table in from 43 to 50 days from seed. One of best autumn and winter salads. Sow from June until August 1/2 inch deep in drills 14 inches apart and thin out to one foot apart in rows. When nearly grown, bleach by tying tips of leaves together.

Green Curled Winter—Price: Pkt., 5c; oz., 15c; 1/4 lb., 40c; postpaid.

Moss Curled—Price: Pkt., 5c; oz., 15c; 1/4 lb., 40c; postpaid.

**ONIONS**

One ounce to 300 feet of drill; 4 to 5 pounds to the acre. Ready for green onions in 60 days. Main crop matures 150 to 190 days from sowing. The onion is most successfully grown in a rich, sandy loam. Continued cultivation upon the same plot of ground contrary to the general rule, rather improves the crop than otherwise. As early as the ground can be worked in the spring, sow the seeds in drills 1/4 inches apart, covering half an inch. When plants can just be seen in the rows, commence hoeing, skimming the surface. Subsequently weed thoroughly and carefully by hand. When tops die, pull onions and spread evenly over the ground; stir or turn until thoroughly dried, then cut the tops off 1/4 inch from the bulb.

GARDEN PEAS

Two pounds to 100 feet of drill; 150 pounds per acre.

Culture—You will have the best results with early peas on light, warm soil, but the main crop will do better on a fairly heavy soil that will retain moisture. Avoid too much nitrogen fertilizer such as fresh manure, as that causes the plants to be soft and weak. The best variety is one that is not improved in flavor.

Snow peas and scarlet runner peas are the earliest. The main harvest is the fall crop.

The taller varieties will do better if supported by bush frames.

The small peppers are the hottest, the large varieties are of the easiest culture. Sow at the usual time and support the plants two feet apart.

Impoved Dwarf—Price: Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 55c; postpaid.

Turnip-Rooted or Hamburg—Price: Pkt., 10c; oz., 15c; ¼ lb., 40c; postpaid.

PUMPKINS

One ounce to 50 hills; 3 to 4 pounds per acre. From 100 to 120 days from sowing to maturity.

Pumpkins are planted frequently in connection with a crop of corn, or as a second crop after early peas, etc. The plants are of the easiest culture. Sow at the usual time for all tender vegetables in drills two inches deep, setting the plants two feet apart.

LATE OR MAIN CROP VARIETIES

* Champion of England—Price: Pkt., 5c; ½ lb., 25c; lb., 40c; postpaid.

* Melting Sugar—Price: Pkt., 5c; ½ lb., 25c; lb., 45c; postpaid.

* Soft Cheese—Price: Pkt., 5c; ½ lb., 25c; lb., 40c; postpaid.

* Improved White—Price: Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 55c; postpaid.

OKRA OR GUMBO

One ounce to 40 feet of drill. Ready for table in from 90 to 105 days.

OKRA OR GUMBO

The pods when young are used in soups, stews, etc. The plants are of the easiest culture. Sow at the usual time for all tender vegetables in drills two inches deep, setting the plants two feet apart.

Improve Dwarf—Price: Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., $1.00; postpaid.

White Velvet—Price: Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 40c; postpaid.

PARSNIPS

One ounce to 100 feet of drill; 5 to 6 pounds per acre. Matures in 125 to 140 days from seed.

Sow in April or early May. Cultivate the same as carrots. They may be dug in the autumn and stored for winter use, but if left in the ground till spring are very much improved in flavor.

Hollow Crown—Price: Pkt., 5c; oz., 15c; ¼ lb., 40c; postpaid.

Improved Guarney—Price: Pkt., 5c; oz., 15c; ¼ lb., 40c; postpaid.

PEANUTS

One ounce to 2,000 plants. Requires from 125 to 190 days from sowing to maturity.

The small peppers are the hottest, the large varieties being quite mild in flavor. Sow in hotbed early in April and transplant to the open ground when the weather is favorable. May also be sown in the open ground when danger of frost is past and soil is warm.
**TOPEPO**

The World’s Newest Vegetable

**SALSIFY OR VEGETABLE OYSTER**

One ounce to 75 feet of drill.

Resembles small parsnip, and when thinly sliced and cooked is a good substitute for oysters, having a very similar flavor. It succeeds best in light, rich soil. Sow early and quite deep. The leaves when they first appear look like grass, making it important to plant in rows.

Mammoth Sandwich Island—Price: Pkt., 10¢; oz., 20¢; ¼ lb., 60¢; postpaid.

**RHUBARB**

One ounce to 500 plants.

Rhubarb is an excellent spring food, possessing medicinal properties. It is the first vegetable of the season from the garden, and no planter should be without it.

Victoria—Price: Pkt., 5¢; oz., 20¢; ¼ lb., 65¢; postpaid.

Linnnaeus—Price: Pkt., 5¢; oz., 20¢; ¼ lb., 65¢; postpaid.

Rhubarb Roots—Price: 10¢ each; 75¢ per dozen; postpaid. By express, 50¢ per dozen.

**SPINACH**

One ounce to 100 feet of drill; 12 lbs. to the acre.

Cultivated very extensively for “greens.” A profitable crop for market. Select a rich, well-drained soil, highly manured. For a succession, sow early in April and again in May in drills, 1 foot apart and 1 inch deep, properly manured. For early spring use, sow early in autumn and protect the plants with a light covering of leaves.

**RADISHES**

One ounce to 100 feet of drill; ready in 18 to 45 days from seed, according to variety.

Radishes must make a rapid growth to be crisp and tender. For early use sow in the hotbed, half an inch deep. For an early crop in the open ground, sow thinly in drills on rich, sandy soil as early in the spring as it is fit to work. For a succession sow every two weeks. Varieties marked (*) good for forcing.

Charlett—Price: Pkt., 5¢; oz., 10¢; ¼ lb., 55¢; postpaid.

Early Bird—Price: Pkt., 5¢; oz., 10¢; ¼ lb., 55¢; postpaid.

Early Scarlet Turnip, White Tip—Price: Pkt., 5¢; oz., 10¢; ¼ lb., 35¢; postpaid.

TURNIPS

Ready from 40 to 60 days from seed. 1 oz. to 150 ft. drill, 2 lbs. to acre.

The Turnip is most easily affected in form and flavor by soil, climate and mode of culture. So in drills about 10 inches apart and half an inch deep, or sow broadcast, but in either case be sure to have the ground rich and freshly dug. Sow for main crop from the middle of July to last of August. In the field, turnips are generally sown broadcast though much larger crops are obtained by drill culture.

#### PRICE OF SEEDS

- Alfalfa: The production of alfalfa seed requires specialized techniques and equipment.
- Sesame: The price is $0.50 per seed.
- Pumkin: The price is $0.85 per seed.
- Silk: The price is $1.00 per seed.
- Celery: The price is $0.25 per seed.
- Tomatoes: The price is $0.15 per seed.
- Spinach: The price is $0.25 per seed.
- Radishes: The price is $0.25 per seed.
- Spices: The price is $0.25 per seed.

**ALFALFA**

Alfalfa is a perennial plant of upright growth, sometimes 3 feet high. The nature of the leaves is somewhat like clover, although not as large. The flowers are a purplish blue and appear in sprays. The seeds are small, yellowish green, kidney shaped and of about the size of a pin head.

#### SUITABLE SOIL

- Alfalfa makes a strong and rapid growth on well-drained, rather heavy land, which is supplied with some lime, and where the sub-soil, while not necessarily sandy or gravel, is porous. On sandy soil the growth is vigorous, when moisture is abundant but during drought it will suffer unless the roots reach water at a depth of 8 feet.

#### SEED Bed

- The land must be free from weeds and the ground must be thoroughly pulverized and well packed. Alfalfa will frequently fail if seeded on freshly plowed ground. If it is necessary to plow the ground before seeding, do it early, harrowing thoroughly and sow after a good rain has settled it.

#### SPRING SEEDING

- Sow seed broadcast or with drill from March to June 15th at the rate of 15 to 20 pounds to the acre.

#### FALL SEEDING

- Disk out and wheat land as soon as the crop is cut, and then harrow or disk every 10 days until the land is free from forage. If it is necessary to sow forage before the 15th day of September, when you can sow as above. Cut for hay the next fall. This is the best time to sow for all except northern states. If you are sure of getting fall rains.

#### SEED POTATOES

One peck will plant about 100 hills, 8 to 12 bushes required to use the acre.

With no other seed is the importance of change more essential than with potatoes, and using our Northern methods, will result in high yields.

### DOMESTIC PARCEL POST RATES

- On Seeds, Plants, Bulbs, Roots, Books, etc., within the U. S. and its possessions.
- Difference in cost of seed. This loss comes from the labor involved in the final expense in getting rid of the weed is much greater in using seed for poor quality than the difference in cost of seed.
- First Zone—within 50 miles of Lincoln 7c, 1e.
- Second Zone—within 50-150 miles of Lincoln 8c, 2e.
- Third Zone—within 150-200 miles of Lincoln 10c, 3e.
- Fourth Zone—within 200-500 miles of Lincoln 12c, 4e.
- Fifth Zone—within 500-1,000 miles of Lincoln 14c, 5e.
- Sixth Zone—within 1,000-1,500 miles of Lincoln 16c, 6e.
- Seventh Zone—all over 1,500 miles of Lincoln 20c, 8e.

### SEED POTATOES

- Types of Seed Potatoes: Early, Maincrop, Late, Seed Potatoes.
- Prices: $0.10, $0.20, $0.35, $1.00.
- Selection of Seed Is Most Important—Poor seed is a primary and great cause for a poor stand. In using alfalfa seed the highest priced seed is often the cheapest.
- The larger bulk of farmers are in using seed for poor quality than the difference in cost of seed. This loss comes from the labor thrown away, the stands lost and yields sacrificed by its use, as well as the final expense in getting rid of the weed seeds introduced.
If seed germinates poorly, one must plant more seed or expect a thin stand. Small, shrunken seed will not produce vigorous plants. Weedy seed means the introduction into the field of plantain, dodder, thistle, mustard or some other pest, ready to take advantage of the fine fertile soil and under care of two years' preparation.

Our alfalfa seed comes from the hardy sections of the North and Northwest, where it is subjected to the extremes of climate. It is free of noxious weeds and conforms with the Nebraska and other state seed laws. In buying our alfalfa seed you can keep it ten days, test it anyway you wish, or have your county agent or experiment station test it. If not satisfactory, return it and we will refund your money.

We will quote Cossack Certified, Grimm Certified, Dakota No. 12, Northwestern (Montana, Wyoming), Northwestern Nebraska and Nebraska Grimm. We will gladly mail samples on request.

CLOVERS

Every farmer should have some land sown to clover, it is of the greatest value for plowing under for supplying humus and nitrogen, greatly enriching the soil and increasing the following crop yield from 20 to 40 per cent.

Cherries

Crane's Golden—Tree vigorous. Fruit above medium, regular surface rich golden yellow, flavor rich and spicy, slightly acid. Especially good for early winter. Season November to January.

Delicious—Fruit is large, with the surface almost covered with a most beautiful bright red blush, blending to golden yellow at the blossom end. In quality it is unsurpassed, in flavor sweet, slightly touched with acid, but only enough so to make all the more delicious, with an aroma delightfully fragrant. The flesh is fine grained, crisp, juicy, melting and withal delicious. In keeping quality it ranks with the best, coming out of storage in March and April in perfect condition. Tree is very hardy.

Jonathan—A delicious dessert apple. Fruit good size, surface brilliant red; flavor rich and spicy, slightly acid. Especially good for early winter; very hardy and productive. Season November to January.

Red June—Size medium oblong, very red. Flesh white, tender, juicy, sweet, with a fine flavor. Quite early and keeps well for summer apple. Tree very hardy, bear-
ing young and abundantly.

Whitley—One of the latest apples. Fruit is medium size and good flavor. Skin is clear white turning pale yellow when ripe. Flesh white, fine grained, aromatic, and of splendid quality. Tree is vigorous, good bearer. Its hardiness, vigor and early bearing commend it. Ripens early in August.

Peaches

Champion—Fruit large, beautiful in appearance, flavor delicious, sweet, rich and juicy; skin creamy white with red turning pale reddish; freestone. One of the best bearers in Ne-
braska. August.

Elberta (Fried)—The great market peach of the South-
west; perfectly hardy in the North and is belied by many
growers to be the best all around peach; color lemon-yel-
low, skin bluish, flesh tender, very juicy; skin creamy white; tender and juicy; tree vigorous; a good shipping peach.

Plums

Opata—A cross between the western Dwarf, Rocky Mount-
in Cherry and Gold Plum. Fruit large dark purplish red with blue bloom; fresh green and firm. Excellent for eating and cooking. Very productive. Ripens first of August.

Compass Cherry-Plum

Absolutely hardy everywhere. The cherry is a cross be-
tween the sand cherry and the minor plum. The fruit is

nearly an inch in diameter, a bright red, sweet and ju-

ey, and a very fine flavor. When young and green the fruits

look more like undeveloped plums, but as they mature,

they become round and this cherry and this plum can be planted wherever it is hard to raise fruit of any kind, for this tree will bear good fruit when others fail. The tree is a regular and a heavy bearer and produces fruit the next

year after setting out.
Underwood—A new plum produced by the Minnesota State Breeding Farm of the University of Minnesota. A big juicy, luscious, reddish yellow, splendid quality. Hardy, good bearer. $1.00 each.

BLACKBERRIES
Plant in rich soil and a little shade, among trees, or on north side of trees, in small places. Of all the varieties tested, the Snyder has proven the hardiest.

Snyder—Medium size, sweet and good, strong grower, productive. Blackberry in a small spot gives the best results. In the light of all the experience we have had with blackberries we are thoroughly convinced that this is the berry for the West and northern States. Should be used where frost is likely. Price: 15c each; 6 for 75c; $1.25 per doz.; postpaid. By express, $1.00 per doz.; $7.00 per 100.

RASPBERRIES
It is difficult to transplant one year plants. Two year plants transplant easily and are cheapest in the end. Plant on strong soil, manure freely, cultivate well, and mulch heavily. Moisture must be retained in order to grow raspberries successfully. Strong, well rooted plants.

RED RASPBERRIES
London—The hardest and most productive of red varieties, very large and of the best quality. Price: 15c each; 6 for 50c; 90c per dozen; postpaid. By express, 75c per 20 miles, can readily be kept in perfect condition for several days after being gathered. It succeeds upon all soils and the canes are absolutely hardy. Price: 15c each; 6 for 75c; $1.25 per doz.; postpaid. By express, $1.00 per doz.; $7.00 per 100.

EVERBEARING RED RASPBERRIES
St. Regis—Plants set early in April gave berries June 20th of same year, and continued to produce ripe berries freely on the dead wood for several years. In addition to the bright crimson color and large size of the fruit, it is so firm and rich in sugar that it will stand shipping 500 miles, can readily be kept in perfect condition for several days after being gathered. It succeeds upon all soils and the canes are absolutely hardy. Price: 15c each; 6 for 75c; $1.25 per doz.; postpaid. By express, $1.00 per doz.; $8.50 per 100.

CURRANTS
Hardy, easily cultivated, stand neglect well, liberally responds to cultivation; indispensable for jellies, etc. Set four feet apart in rich ground; cultivate well or much heavily; prune out old wood so that each remaining shoot will have room to grow. If the currant worm appears use two way spray.

Cherry—The red berries sometimes more than half an inch in diameter, bunches short, vigorous and productive when grown in good soils and well cultivated.

Fay's Prolific—The leading market variety; bunches and berries large and uniform in size, color red, easily picked; exceedingly productive.

White Grape—Very large, yellowish white, sweet or very mild acid. Excellent quality and valuable for the table. Productive.

Wild—One of the strongest and most productive. Bunch and berries very large, bright, attractive red color, even when dead ripe; hangs on bushes in fine condition for several days after being gathered. It succeeds upon all soils and the canes are absolutely hardy. Price: 15c each; 6 for 75c; $1.25 per doz.; postpaid. By express, $1.00 per doz.; $8.50 per 100.

GOOSEBERRIES
Plant in good rich soil in rows 5 feet apart by 3 feet in the row, and give a liberal dressing of manure every season. Prune bunches back as much as for the production of fine fruit. The English varieties do the best in partial shade and should be heavily mulched.

Downing—An old and well-known variety. Fruit large and handsome, pale green, of fine quality. A strong, vigorous grower, seldom affected by mildew. One of the best. Price: 50c each; 6 for $1.75; $3.35 per doz.; postpaid. $3.25 per dozen, by express.

GRAPES
There is scarcely a yard so small, either in country or city, that room for one to a dozen or more grape vines can not be found. The Vine can be trained up the side of any building or along the garden fences, occupying but little room and furnishing an abundance of the healthiest of fruit. Make the soil mellow and plant the vines some what deeper than they stood in the nursery. Plant about 8 feet apart by the fence or building. For vineyards make rows 8 feet apart, 6 to 10 feet in rows.

Note: Our grape vines are all strong, well rooted plants.

GRISWOLD’S SUPREME PEONIES

The Aristocrat of the Flower World

Peonies stand in the forefront in popularity of all flowers. They are the grand favorites in the fashionable flower garden, and the wonderful new varieties that have been introduced during recent years, have truly made the peony the aristocrat of the flower world.

The gorgeous flowers, which far surpass the finest roses in size, form and color, are produced in great abundance. After once well started, each succeeding year brings greater and better blooms. Peonies are very hardy, they thrive in any well-drained locations. There is nothing prettier than a peony in bloom from early May to late June. The varieties offered here are the choice selections from our choice selections from our choice selections. All very good and the finest selection. Iris can be planted at almost any time during the year. We recommend early spring.

ROSES
Two Year Old Field Grown Roses Trimmed and Ready for Planting
As long as the rose exists it will retain its popularity with the human race.
In Preparing a Rose Bed. Select a sunny location guarded from cold north winds, if possible. Dig out the beds to a depth of two or three feet and about three feet in width; then refill the trench with a mixture of soil (any good fertile soil will do) and well rotted manure, making provision for good drainage if location is not naturally drained. Time should be allowed for this filling to settle, the final top surface being an inch or two below the edges of the bed. Do not raise the surface of Rose beds above the surrounding surface. They suffer less from drought when the bed is free from cold north winds, if possible. HARDY ORNAMENTAL SHRUBBERY

The planting of shrubs, or perhaps combined with shade trees, with some conception as to the effect to be produced is a matter to be considered by everyone who wishes to complete the picturesqueness of a villa residence or country home. Shrubs around a house hide unsightly corners, and the hard, straight lines of the architecture, or grouped at a distance, by the side of walks, carriages drives and fences, they break what might be a monotonous line of the house, and give a tone of privacy to the home surroundings. While the shrubs we send out are of large size, they are not so large but that they can be sent by parcel post with the greatest care.

Prices of ornamental shrubs are postpaid unless otherwise stated.

AMMONIUM SULPHATE

A Nitrogen Fertilizer

Ammonium Sulphate is a natural by-product of Coke Ovens. It has been known as a high grade carrier of Nitrogen for about fifty years. Some idea as to the value of Ammonium Sulphate as a fertilizer is shown by the fact that 100% of the manure from one cow contains as much Nitrogen as 100 pounds of Ammonium Sulphate. It is used dry or dissolved in water for sprinkling. Use it and your flowers will flourish; their health will last. Trial size, 50c of Ammonium Sulphate in nitrogen content, it would take: 100 pounds Nitrate of Soda or 250 pounds Cotton Seed Meal or 1,500 pounds of ordinary fertilizer or 4,000 pounds of good stable manure.

For Garden use take the soil 1 pound to every 150 square feet. One pound is sufficient for one year on old tree or ½ pound for a 2 year plant. For field crops apply 100 pounds per acre. Prices: 2-lb. package, 40c; 25 lbs., $2.25; 50 lbs., $4.00; 100 lbs., $7.50.

VIGORO

Is the result of many years of careful study, scientific research and actual growing tests. All of this work was necessary to develop a product that would make it possible for the planter to know and apply the right amount and kind of food at the proper time. Not only has this been accomplished, but a plant food has been developed with no unpleasant odor and one that can be conveniently applied by the user. VIGORO is packed in convenient sizes of 2, 2.5, 5 and 100 pounds. In each bag you will find the Home Beautiful Booklet, giving full directions for the application of VIGORO, as well as valuable information concerning the making and care of the lawn, the home garden, shrubbery and flowers, etc.

We recommend that VIGORO be applied at the rate of one to four pounds per 100 square feet of surface. For early spring application, two to four pounds should be applied. For summer and fall application, one to two pounds is sufficient.

The following table has been prepared to help the user determine the quantity of VIGORO that will be necessary for a given amount of ground.

HYDRATED LIME

The constant watering of lawns tends to sour the soil and eventually the lawn becomes foul with sour, water grass and other weeds which are not the application of VIGORO, as well as valuable information concerning the making and care of the lawn, the home garden, shrubbery and flowers, etc.

This condition may be improved by applying Hydrated Lime. It will correct acidity and greatly improve the condition of the lawn. On very heavy soils it should be applied sparingly at first and should be applied more frequently. Heavy soils sometimes are slow to absorb the first application, but improvement may be noted by the time the second application is made.

The more foul the lawn is with those plants thriving on acid soil, the more lime should be applied, as it will correct in the soil the Blue Grass and Clover will begin to grow more luxuriously.

Prices: 10 lbs., 50c; 25 lbs., $1.50; 50 lbs., $3.00; 100 lbs., $5.00.

CONKEY'S POULTRY REMEDIES

MONEY BACK IF THEY FAIL.

CONKEY'S ROUP CURE

Is a scientific preparation, in tablet form, and when dissolved in water is absorbed by the body three times over, purifying the system, allaying inflammation and reducing the fever. It not only cures, but prevents colds, scorch, canker, tarrh and diphtheria and should be given to all fowls frequently to keep diseases away.

Conkey's Roup Cure is quite different from many so called cures, which may cure a cold, but never a genuine equal cure of Roup. Extra large boxes, 50c; smaller size, 35c; postpaid.

Lee's Yapo Spray is a compound of oil of pine tar. coal tar and eucalyptus for treatment of colds, sneezing and influenza.

Scaly Leg Remedy, 35c and 65c packages.

Small size, nickel plated . 2.75

Cords extra . 50

Large size (2 gallon size), nickel plated only . 5.00
